The Volunteer's Dilemma with Prof. Blit | Goosenomics Episode 1

We've all been in a situation where a professor is teaching and everyone in the class is lost. Often in those situations no one raises their hands even though everyone in the class would benefit. Why?

It turns out game theory has an answer. We discuss this phenomena with Professor Joel Blit. We also discuss other, more serious situations of this game and some potential actions one can take to change the game.

Oops, we couldn't find that track.
